EXPERIENCE

Computer Science Tutor | <https://www.saddleback.edu/student-support/tutoring-center>

Saddleback College

Mission Viejo, CA

January 2024 - present

- Covered topics ranging from introductory to intermediate Java and C++, as well as Data Structures
- Improved learner's repertoire of skills and knowledge by providing strategies and tips, modeling effective skills and habits with coursework
- Empowered hundreds of students each semester to become independent through Socratic tutoring principles

Web Developer | <https://thecodebase.org/>

The CodeBase

Mission Viejo, CA

September 2024 - December 2024

- Collaborated with a team of six in a fast-paced environment to design and develop websites for local organizations and small businesses
- Utilized HTML, CSS, JavaScript, and React to create user-friendly, responsive websites
- Engaged in regular client meetings to gather requirements, provide updates, and incorporate feedback, enhancing project outcomes and client satisfaction

Web Developer | <https://www.maseuropeanpizza.com/>

Mas European Pizza

Mission Viejo, CA

May 2019 - June 2023

- Developed and maintained the company website, iterating based on user feedback
- Implemented an online menu and pricing page, allowing customers to easily access and download menu options and party packages
- Added a contact form after receiving feedback about the need for easier communication
- Created and optimized the Yelp business page in response to feedback about improving exposure, leading to increased visibility and customer engagement

Projects

League of Legends Stat Tracker | https://github.com/LeissAmini/lol_stat_tracker

- Built a website using JavaScript, HTML, CSS, React, and Node.js to provide users with up-to-date information on the best champions in the game
- Developed a web scraper using Puppeteer to ensure real-time updates of champion statistics
- Led sprint meetings and facilitated teamwork by following Scrum best practices, ensuring efficient project progress and collaboration.

NBA Lineups | <https://github.com/LeissAmini/NBA-Lineups>

- Developed an iOS application using Swift and SwiftUI to provide real-time NBA game information
- Integrated the NBA API to retrieve accurate and up-to-date data on games, ensuring users have access to the latest stats and information
- Designed a UI that simplifies traditional NBA interfaces by reducing unnecessary information

Personal Website | <https://leissamini.github.io/>

- Developed a portfolio website using React, JavaScript, HTML, and CSS, hosted on GitHub Pages, to showcase technical projects and skills
